Introduction to VueJS  
Framework

Software Security for Web  
Applications

Data Security for Web  
Developers

Angular for Front End  
Engineers

Jun 16, 2025

**Abhinav Gupta**

has successfully completed the online Specialization

# Web Technologies and Security

This specialization is intended for people without programming experience with JavaScript frameworks and who seek to develop web application and security skills. In these four courses, you will cover everything from the fundamentals of VueJS to properly securing data in web development. These topics will help prepare you to write anything from small web applications to securing back-end systems. Learners who complete this specialization should have enough understanding of JavaScript frameworks to tackle other common tools like React or Svelte.
