

8 Courses

Foundations of Coding Back-End

Introduction to Programming With C#

Back-End Development with .NET

Database Integration and Management

Security and Authentication

Performance Optimization and Scalability

Data Structures and Algorithms

Deployment and DevOps

Jun 16, 2025

Abhinav Gupta

has successfully completed the online Professional Certificate

Microsoft Back-End Developer

Those who have earned this professional certificate have demonstrated their job readiness through hands-on experience and practical application. They possess a strong foundation in back-end development, including designing and optimizing web APIs, managing relational databases, implementing security and authentication measures, and optimizing application performance for scalability. They are proficient in modern frameworks like .NET, have applied advanced C# techniques, and leveraged Microsoft Copilot for coding and debugging. This certification proves their ability to build and deploy secure, efficient, and scalable back-end systems.
